

Petroleum & Refining Basics Seminar

Joe Barth in association
with Haverly's MUG 2018.

Thursday, September 20th, 2018 Nashville, TN

The P&R Basics course will offer participants a brief introduction to the petroleum industry and refining in particular. The primary focus will be on how a refinery works. The program will initially review crude oil supply and petroleum product demand, then it will address such issues as crude oil qualities, refinery configurations, product quality and planning/logistics.

Who Should Attend?

This course is intended for anyone wishing to further advance their career in petroleum refining by starting at the basics of the industry. The course is for everyone in the refinery/petrochemical industry, including traders, process engineers, process control engineers, operations personnel and planners. The seminar is also useful for anyone in support functions: law, medical, purchasing, controllers, security, public relations and human resources. No prior knowledge of refining/petrochemicals required. Newcomers and new managers are especially welcome!
